Workshare
Professional 10

Bring content comparison and data security to all the places you work

Compare and secure every file, everywhere with Workshare Professional 10. From the desktop, in the cloud, on any platform, with Workshare you get a market-leading solution integrated into your working life.

Compare

Workshare Professional 10 gives you lightning fast and dead accurate content comparison everywhere you work.

Compare any type of content in any file. Integrate Workshare with your document or case management system, and operate online or from the desktop.

New in Workshare Professional 10:
▶ Powerful Excel comparison
▶ Simple comparison from Outlook
▶ Improved PDF comparison

Secure

Prevent accidental data loss by automatically removing sensitive metadata from files before they're shared.

Workshare Professional 10 swiftly cleans files of sensitive content, however they are shared.

Be confident documents only contain the information you wanted to share.

Integrate

Workshare Professional 10 integrates with Windows, Office, and all major document and case management systems.

We're continually adding to our family of partners; building relationships and enhancing integrations to give you seamless experiences everywhere you work.

Make Workshare Professional 10 part of your eco system, so 2 applications can behave as 1.

Use Workshare with iManage, NetDocuments, OpenText, Worldox, Google G Suite, SharePoint…and more!

Lead

Workshare has been in the business of understanding change for 20 years, and change matters.

Reviewing an important file?

Managing new security threats?

Choose the market-leading solution to help.

Let's talk!

Professional 10

Compare

▶ Compare Word to Word, PDF to PDF, PowerPoint to PowerPoint, Excel to Excel and Word to PDF using patented DeltaView technology.

▶ Select sections of text, images or tables to compare, rather than an entire file with Selective Compare.

▶ Every change is quantified and categorized, so it's simple to see what matters most in a file.

▶ Easy access to comparison functionality from Outlook and individual emails.

▶ Embedded in your DMS, you can run comparisons directly from within that platform.

▶ Accept and reject changes made in modified versions and pull them back into the original document, always preserving your formatting and style.

Secure

▶ Scrub documents of metadata and secure all your files before they're emailed or sent outside your firm.

▶ Apply specific security policies, so sensitive content never leaves your firm unintentionally.
