

Workshare Professional 10

The fastest, most accurate file comparison and protection, ever

The latest release of Workshare combines market-leading comparison and metadata removal in one, simple desktop solution. It includes online services that extend collaboration beyond the desktop, giving you the ability to share new versions more efficiently and securely than ever before.

Be accurate

Documents have become more complex and Workshare Compare has evolved to be more accurate.

Workshare Compare masters the art of comparing tables, detecting changes to their structure and their content.

Advanced table comparison goes above and beyond. It finds changes in complex tables, tables within tables, and overlapping tables - comparing them accurately and displaying results beautifully.

Be fast

Stay on top of versions and amendments by catching them as they arrive in your inbox.

Workshare Compare checks incoming attachments to see if they're changed versions of documents you sent out. From your inbox, open the comparison with a single click.

Be selective

Sometimes you don't need or want to compare a whole document in the process of a review. Now you can be more selective when you compare.

Choose two snippets of text or code, you can also compare two images or tables - any content really - and run a comparison with Workshare Professional 10. Powered by our powerful DeltaView technology, you get dead accurate results on any specific content you need to review.

Be sure

Stop worrying about whether that document you sent to your important client includes embarrassing metadata. Workshare checks and cleans every document you share; however you share it.

Workshare's cutting-edge metadata cleaning engine reduces the time it takes to scan and clean an average document by 65% - the fastest in the market.

You can be confident your documents are sent securely and the contain only the information you intended to share.

Workshare Professional 10

Compare

- Compare Word to Word, PDF to PDF, PowerPoint to PowerPoint, and Word to PDF using patented DeltaView technology.
- Select sections of text, images or tables to compare, rather than an entire file.
- Extend Microsoft Excel's comparison to your DMS.
- Every change is quantified and categorized, so it's simple to see what matters.
- Receive change notifications in Outlook, alerting you to changes in the attachments you're sent.
- Embedded in your DMS, you can run comparisons directly from within that platform.
- Accept and reject changes made in modified versions and pull them back into the original document, preserving formatting and style.

Secure

- Scrub documents of metadata and secure all your files before they're emailed or sent outside your firm.
- Apply specific security policies, so sensitive content never leaves your firm unintentionally.

The technical bit –
