

Workshare Powered by the Microsoft Azure Cloud Platform Offers Innovative File Comparison, Protection, and Secure Document Sharing Solution

MICROSOFT AZURE SOLUTION BUILDER PROFILE: WORKSHARE

Workshare's innovative, intelligent platform empowers professionals to compare, protect, and share high stakes documents on any device. Content owners can accurately track and compare amendments made by all contributors. Businesses have secure ways to work collaboratively and control the process of constant change using Workshare technology.

WHAT WE OFFER

Since going to market with DeltaView technology, Workshare has honed and perfected file comparison software. Workshare accurately identifies and highlights changes to Word, PDF and PowerPoint files, no matter how large the file or complex the content. Azure VM Scale Sets ensure resources exist to meet user demands.

Workshare cleans files of metadata so sensitive content isn't inadvertently shared by customers. Workshare can apply a firm's security policies, and our metadata engines crawl the content of files, automatically removing sensitive data before sharing occurs. Azure Advisor ensures our infrastructure is always protected.

Secure file sharing with Workshare enables true online collaboration. Customers can organize files in groups and folders, inviting others with secure access. Users can take files through structured reviews until the perfect final version is delivered, as comparison technology is built in. The global scale of Azure delivers access to users anytime, anywhere.

Workshare Transact enables lawyers to run transactions effectively and productively. Online workspaces are created based on a deal checklists that would previously have been created in Word or Excel. Hosted and powered by Azure IaaS, Workshare offers the efficiency to manage deal checklists and deliver closing binders within hours of deal closing.

WHAT OUR CUSTOMERS ARE SAYING

"Being able to offer world-class tools from Workshare, which help the team save time and get up to speed, is a great benefit to joining our firm." – David Bullock, Director of IT, Ward Hadaway

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
