Compare Server

Embed document comparison in your business

Get 100% accurate document comparison

Embed comparison within other applications

Speed up review processes on high stakes documents

Compare multiple versions of a file from any device to instantly see what's changed.

Workshare Compare Server can be hosted in the cloud or installed on-premise. Then you can create a unique comparison experience for your business.

Embed comparison in applications like iManage and NetDocuments to streamline and automate document review. Or, customize and create your own unique front end.

Powered by Compare Server, you can assess the materiality of changes quickly and confidently in your high stakes documents.

Easy to use

Document authors and reviewers can easily access, review and verify changes as they work in parallel, without having to download or open additional applications.

Hard to resist

Hosted in the cloud or on-premise, Compare Server is the most flexible way to get file comparison into the applications you use. Plus, you will reduce the risk of overlooking any changes or comments made to your high stakes documents.

Use Workshare Compare Server if you want...

- ✓ **Flexible file comparison** – Compare two documents and get an accurate redline from within other applications.
- ✓ **Accurate redlines** – Assess changes by category and therefore materiality with the most accurate redline available.
- ✓ **Faster review cycles** – Increase productivity by automating comparison and reducing the time a review process takes.

Change matters

Customize and embed **Compare Server** into your existing internal and web-based applications to experience the difference.
