

Workshare

Faster, more
accurate &
designed for you

Improved speed and performance delivered to you

Improved PDF comparison

2x faster metadata cleaning

Quieter licensing

Accuracy in document comparison is everything and we know how important it is to you. With the latest Workshare release, your redlines are now clearer and easier to read.

The way you compare complex tables has been improved. Complex structures in tables can be compared accurately and displayed beautifully, so you'll be able to see and understand every difference.

We've also focused innovation around comparison within PDF. Now, you won't have to convert documents or move between platforms to carry out your comparison – it all takes place within the PDF. With improved Optical Character Recognition also included, you get both a faster and more accurate result.

Your time is precious and speed is the key when cleaning metadata from the documents you're sharing. You want to just clean it and send it, right?

Because documents don't have to be opened now to scrub them, the process is 65% faster than in previous versions of Workshare. The improvement is especially felt when you're sharing very large files – whoosh, they're gone.

The other thing we've done is implement a quieter approach to licensing. This means we won't interrupt your workflow when it's time to renew. Instead when a license is due to expire we notify your administrator and leave you to get on with your job.

You should use Workshare if you want...

Accuracy – Change matters and with complete accuracy when you're comparing Word, PDF or PowerPoint files, you'll never miss a thing.

Speed – Removing sensitive metadata from your files before they're shared now takes a matter of seconds, but the protection offered is limitless.

Other solutions don't compare

We're focussed on the core areas crucial to you. Metadata cleaning is **65% faster**, and document comparison is **100% accurate**. Other solutions just don't compare.

Workshare

Faster, more
accurate &
designed for you

Improved speed and performance delivered to you

Listening to you

Through insights gained from extensive customer research, we've innovated our core products. Honing in on Word Table comparison and PDF comparison, both elements are now more accurate than ever. And, your redlines are displayed beautifully. Changing the way the application loads means comparison is up to 30% faster than in previous versions.

The road to delivery

Improvement is a journey, not a destination. We have created a transparent roadmap on our website to give you visibility of everything that's coming up. You can contact us anytime to talk about these developments. It's also an opportunity to let us know if there's something else you think should be on the roadmap.

Let's get involved

We love our customers and our software, so let's get involved! If there's anything we can do to improve our relationship or our solution, let us know. We've published a brief Q&A on the roadmap page of our website, which we'll update based on your input. You can contact us anytime by emailing Marketing@workshare.com
